Amendments to the Abstract

Please amend the original abstract as follows.

ABSTRACT

In a DVD player, when data information in a DVD 4-disk is played back, it is judged whether the data information is protected by a copyright or not on the basis of disk control information. Further, it is judged whether the DVD disk 4-is writable or not, based on whether the DVD disk 4-is provided with a wobble or not. Thus, if the data information is protected by the copyright and the DVD disk 4-is writable, a playback of the DVD disk 4-is prevented so that an illegal use of the DVD disk4, which infringes the copyright, is effectively prevented.
